Storage lockers give each student or team a secure, named space for half-finished projects, tools and materials between lessons, so work is not lost, damaged or confused. Lockable trays, shelves and full-height lockers cover different project scales.

Key Features

- Single or multi-compartment lockers
- Key or combination locking
- Ventilated designs for glue and paint
- Shelf and tray configurations
- Label holders on the doors

Typical Uses in the Workshop

- Store in-progress projects between lessons
- Keep team tools and materials together
- Protect finished work pending display
- Secure expensive components overnight

Safe Operation

1. Assign lockers with name labels
2. Log the contents on the card
3. Lock the locker after each session
4. Check lockers for forgotten items termly
5. Reassign lockers each project cycle

SAFETY NOTES

- Keep hazardous materials out of student lockers
- Do not block fire exits with lockers
- Check lockers are fixed or stable
- Store sharp items in sheaths inside
- Report lost keys immediately

Maintenance & Consumables

- Check locks and hinges termly
- Replace lost keys and labels
- Clean out forgotten projects at term end
- Tighten fixings to the wall
- Repaint worn locker fronts

Specification & Buying Notes

A bank of lockers sized to the largest student projects with quality locks suits most workshops. Ventilated locker doors help drying projects. Add an inventory board mapping lockers to names.
