

Burn Gel and Dressing Refill Packs

DT Workshop Equipment Reference — D&T / STEM resource for school workshops | Safety & First Aid

Burn gel cools and soothes burns immediately while hydrogel dressings cover and protect the wound, and refill packs keep the first aid kit stocked after use. Workshop burns need the right kit, restocked the moment it is used.

Key Features

- Burn gel sachets and tubes
- Hydrogel dressings in sizes
- Sterile sealed packaging
- Single-use formats
- Refill cartons for kits

Typical Uses in the Workshop

- Cool minor burns fast
- Cover burns while seeking help
- Restock kits after incidents
- Provide burn first aid training

Safe Operation

1. Run cool water over the burn first
2. Apply the gel generously
3. Cover with the dressing without sticking
4. Keep the area cool for 20 minutes
5. Replace the used kit items

SAFETY NOTES

- Do not burst blisters or apply butter or creams
- Do not peel stuck clothing from a burn
- Seek medical help for serious burns
- Check the expiry dates
- Keep the refill stock accessible

Maintenance & Consumables

- Restock after every use
- Check the gel and dressing expiry
- Keep refill packs with the kits
- Train staff on burn first aid
- Log the incident

Specification & Buying Notes

Buy certified burn gel and dressing refill packs designed for first aid kits. Quality gel stays soft; cheap dressings stick. Restock immediately after any use.
