

Heavy-Duty Apron Hooks and Storage Racks

DT Workshop Equipment Reference — D&T / STEM resource for school workshops | Workshop Furniture & Storage

Apron hooks and storage racks hang workshop aprons and protective clothing neatly by the entrance or changing area, letting students put on protection before entering and keeping PPE visible, aired and accounted for.

Key Features

- Wall racks with multiple hooks
- Heavy-duty fixings for weight
- Numbered hooks for classes
- Apron and coat sections
- Ventilated hanging

Typical Uses in the Workshop

- Store class aprons between lessons
- Issue aprons at the workshop entrance
- Air-dry worn aprons properly
- Protect garments from dust

Safe Operation

1. Hang aprons on the numbered hooks
2. Take the apron at the door, return it after
3. Check the hooks hold the weight
4. Keep the rack area clear
5. Audit the aprons termly

SAFETY NOTES

- Mount the rack to wall studs
- Do not overload the hooks
- Keep the rack clear of the fire exit
- Check hooks for sharp edges
- Store flammable garments away from heat

Maintenance & Consumables

- Tighten the mounting screws
- Replace bent hooks
- Clean the rack area
- Inventory the aprons
- Repair torn aprons

Specification & Buying Notes

A sturdy wall rack with individual hooks sized to the class count. Rust-resistant hooks handle damp aprons. Numbered hooks make return-to-peg systems work.
