

Pegboard Hooks and Holder Assortments

DT Workshop Equipment Reference — D&T / STEM resource for school workshops | Workshop Furniture & Storage

Pegboard hook assortments provide the hooks, holders, shelves and clips that turn a plain pegboard into organised tool storage: straight and curved hooks for tools, wire baskets for small parts and rings for rolls of tape.

Key Features

- Straight, curved and double hooks
- Wire baskets and shelves
- Tool and spanner holders
- Assorted diameters and depths
- Metal hooks with plastic tips

Typical Uses in the Workshop

- Hold hammers, wrenches and screwdrivers
- Organise small parts in baskets
- Display rolls of tape and cable
- Convert pegboards into tool walls

Safe Operation

1. Insert the hook into the hole
2. Hang the tool over the hook
3. Group tools by family and use
4. Balance the board load
5. Remove and relocate as needed

SAFETY NOTES

- Check hooks are seated and not sharp
- Do not overload hooks and boards
- Keep sharp tools pointed down
- Check the pegboard is fixed to the wall
- Re-seat hooks that work loose

Maintenance & Consumables

- Replace bent and broken hooks
- Re-seat loose hooks
- Dust the board and hooks
- Inventory the common hooks
- Restock the assortment

Specification & Buying Notes

An assortment pack covering straight, curved and basket hooks suits most pegboards. Quality hooks seat tight; cheap ones wobble and let tools fall. Buy for the hole diameters.
